

STV-3 Manhole Zoom Camera – The »electronic sewer periscope«

- Routine inspection of pipes and sewers
- Inspect manholes and containers without entering them

- ✓ **Rugged:** Camera case filled with shielding gas at overpressure and fitted with pressure monitor. Can be tilted all the way from horizontal to vertical
- ✓ **Bright as daylight:** huge lighting power (2000 lumen) thanks to 12 late-model LEDs for extended range
- ✓ **Farsighted:** 22x optical magnification plus additional digital zoom. Automatic focusing and manual focusing controlled by joystick
- ✓ **Convenient to operate:** Controls suited for a construction site with daylight TFT display and integrated SD card recorder
- ✓ **Record-making ability:** Image and video recording on an SD card and image transmission to tablet PC or notebook by pressing a button
- ✓ **Adaptable:** Choose from two rod systems: standard 26-ft telescope rod or rugged set of connecting rods reaching up to 52 ft.
- ✓ **Steady:** Aluminium tripod with swivel bearing for smooth camera operation, even at high zoom factors
- ✓ **Long-running:** Choice of power supply among 230 V AC, 12 V DC (car battery) or battery pack with 4 h life
