# WHAT'S INCLUDED WITH ZENITH

Patent Pending

## TRIPOD

Constructed with high strength, lightweight material.

### VERSATILITY

90° Leg movement allows for limitless tripod configurations.

### COMPACT

Folds up and stores small.

## ZENITH

3 axis of directional control conquers the hard to reach, vertical spaces with ease.

### CAMERA

30x Optical Zoom camera, capable of recording up to 4K UHD Video and 18.2MP still photos, provides ultra-clear inspection data.

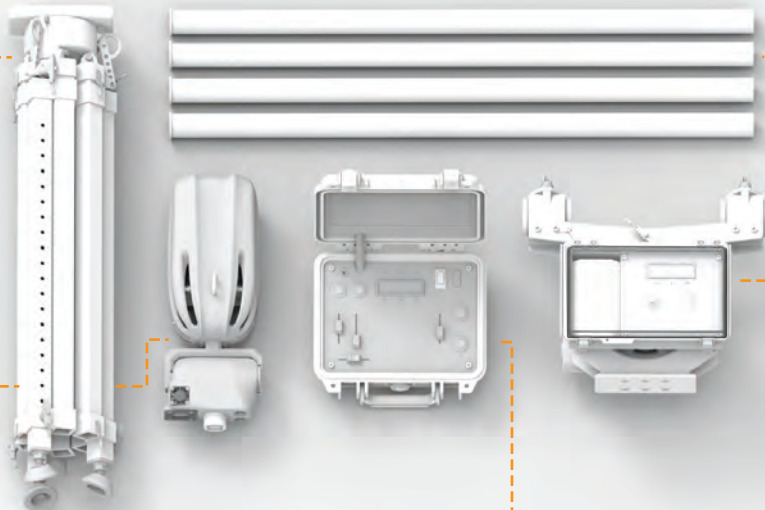

### WIRELESS OPERATION

Operate the Zenith without the hassle of bulky tethers.

### COAX DRIVE SYSTEM

Featuring dual brushless motors that stabilize and orient the Zenith to maintain precise heading lock.

## EXTENSION ARMS

Capable of up to 12 ft in extension, the arms allow for safe and easy operations, without the need to enter confined space.

### HIGH STRENGTH

Made from aviation grade aluminum.

## WINCH

Featuring 500ft of 1mm high strength, industrial grade cable and complete wireless transmission from the Controller to Zenith.

### DEPTH TRACKING

Utilizing a high precision hall effect encoder allows for live depth tracking during the inspection.

### SPOOLING SPEED

High torque/speed motor provides up to 100ft/min ascent and descent speed.

## CONTROLLER

Long range wireless operation allows for inspections to be conducted from nearly anywhere on site.

### HEAVY DUTY

Constructed into a hard Pelican case ensures lasting reliability and easy transport.
